

Step 1 is fabric placement line. Lay a generous piece of fabric over the placement stitch (at least half an inch of extra fabric all around the design)

Step 2 tacks down the fabric. Trim fabric before moving on to the next step. Leaving a quarter-inch seam allowance will allow for fraying and a raggy look. Trimming close to the line will allow for a more polished look (depending on your material you may wish to use a fusible product like Heat-n-Bond Light).

Step 3 is bean stitch finishing stitch.

The zip file includes the following sizes to coordinate with our *Stacked Serif Floss Applique Monogram* (sold separately). For example, if you select the design file named:

AmpersandForI2SStackedSerifFlossApp_3_5in.pes

you will select two of the “lowercase” letters from the 3.5” size of Stacked Serif Floss Applique like:

I2SStackedSerifFlossApp_3_5in_al.pes and **I2SStackedSerifFlossApp_3_5in_bl.pes**

to create a design that reads **A & B**.

Combined design size may be a bit wider than the dimensions listed below.
